This information clearinghouse is provided by the Police Foundation and the Office of Community Oriented Policing Services (COPS) as part of Grant #2002-CK-WX-0303, “The Police Foundation Crime Mapping Laboratory: Enhancing Community Policing and Problem Solving Through Problem Analysis, Crime Analysis, and Crime Mapping.” The clearinghouse provides a comprehensive list of bibliographic and Internet resources that may be useful to practitioners and researchers interested in the disciplines of problem analysis, crime analysis, and crime mapping. The bibliographic references are composed of books, articles, and reports that relate to topics such as crime analysis, problem solving, geographic information systems (GIS), crime mapping, and Internet mapping. The Internet resources provided at the end of the document include links to additional sources of information concerning crime analysis and crime mapping. Although every effort has been made to ensure that this guide is comprehensive, it was not possible to include every bibliographic and Internet resource. Therefore, only those resources deemed most relevant by the staff of the Crime Mapping Laboratory have been included. In addition, it should be noted that inclusion of crime analysis and crime mapping software resources does not imply an endorsement or recommendation for any particular product by the Police Foundation or the COPS Office.

The Table of Contents below includes hyperlinks to the rest of the document. By simply clicking on a topic of interest in the Table of Contents, you will be taken to that particular section of the document. Since this document is approximately 50 pages long, you may wish to highlight a section that you would like to print. Otherwise, the entire document will be printed if you select Print from the File menu.
Table of Contents

I. Bibliographic References

◆ Crime Analysis and Problem Analysis
◆ Crime Mapping
◆ Cartography (General Map-Making Resources)

◆ Geographic Information Systems
   Introductory Resources
   General Resources
   Data Issues
   Applications for GIS
      Community
      Urban
      Government
      Environmental
      Other
   Software

◆ Spatial Analysis (General Resources)

◆ Specialized Topics
   Global Positioning Systems
   Internet Mapping
   Remote Sensing

II. Internet Resources

◆ Links to General Crime Analysis and Crime Mapping Resources
Crime Analysis and Problem Analysis

International Association of Crime Analysts. (Multiple issues). *Forecaster*.
