

COPS Interoperable Communications Technology Program (ICTP)

Mike Dame, Supervisory
Senior Policy Analyst

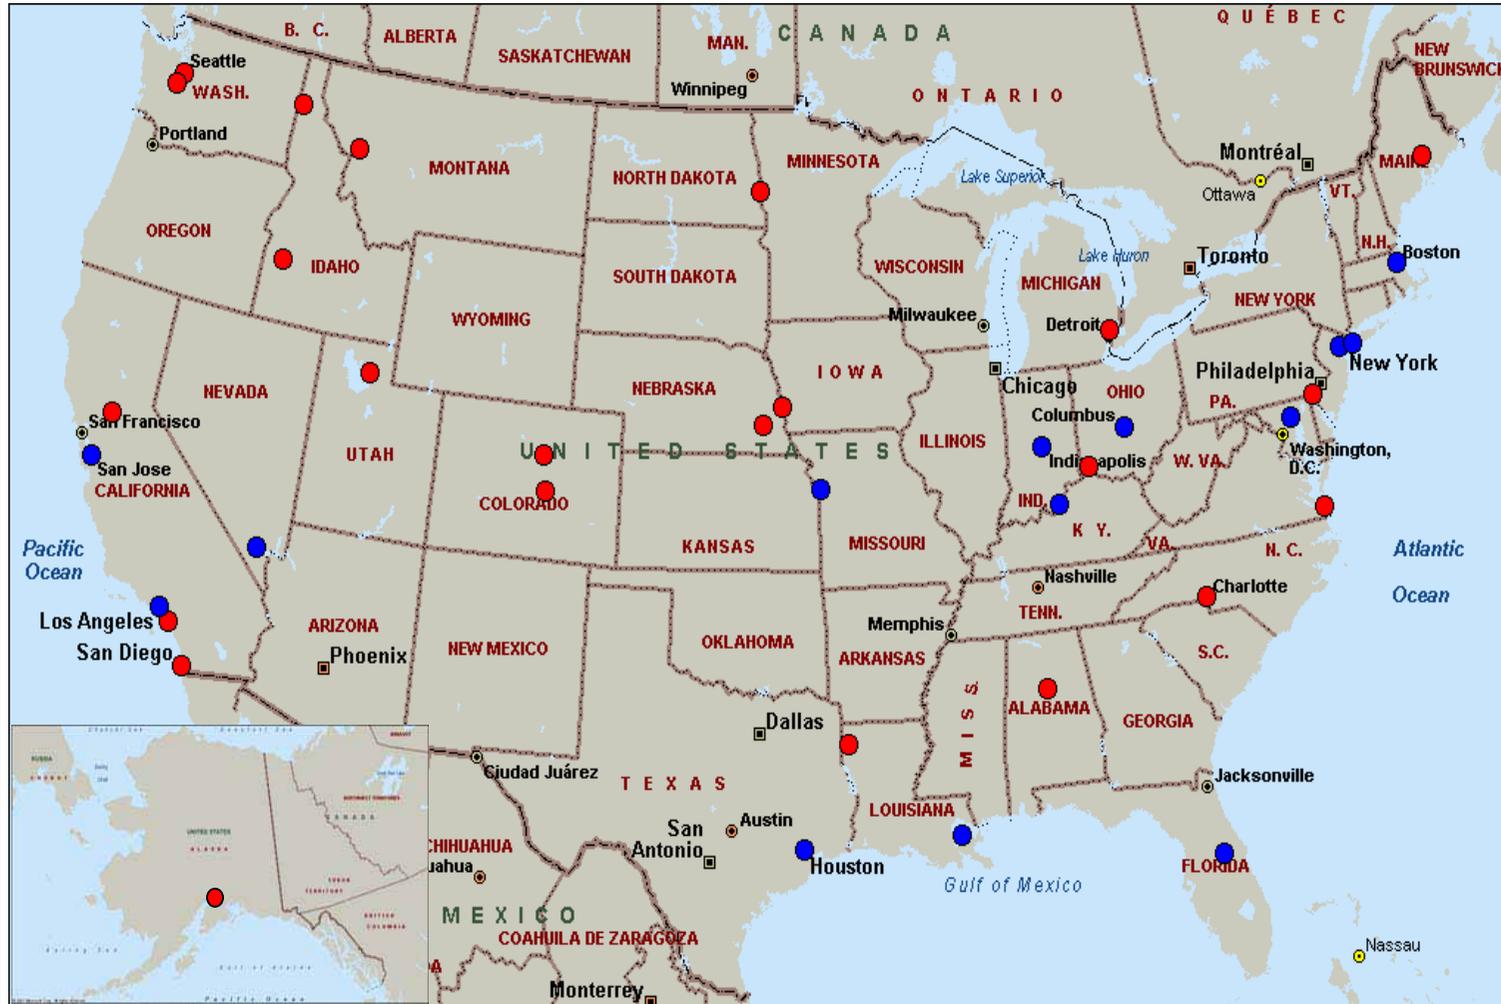

Program History

- Investments made by the COPS Office for discretionary interoperability grants:
 - FY 2003 Program -- \$66.5 million awarded to 14 jurisdictions
 - FY 2004 -- \$82.6 million awarded to 23 jurisdictions

ICTP Grants – FY '03 & '04

U.S. Department of Justice, Office of Community Oriented Policing Services

COMMUNITY ORIENTED POLICING SERVICES
U.S. DEPARTMENT OF JUSTICE

Purpose

- Award technology grants to law enforcement for the purpose of enhancing public safety wireless voice interoperability and data information sharing.

COPS

Interoperable
Communications
Technology
Program

Program Characteristics

- Regional Projects
- Multi-jurisdictional
- Multidisciplinary
- Strong governance structure and sound project management
- Grant-in-aid
- 25% local cash match
- Federal cap of \$6 million
- Targeted program using Metropolitan Statistical Areas (MSAs)
- Large and smaller population centers

U.S. Department of Justice, Office of Community Oriented Policing Services

Federal Partnerships

- **Since 2003, the COPS Office has coordinated closely with the following organizations:**
 - Office of Justice Programs (NIJ and BJA)
 - DOJ High Risk Metropolitan Areas Interoperability Project (25 Cities)
 - SAFECOM, program within DHS
 - NIST
 - Office of State and Local Government Coordination and Preparedness (formerly ODP)
 - FEMA

Examples of COPS-funded Projects

Central Maryland Area Regional Communications Project (CMARC)

"INTEGRITY...FAIRNESS...SERVICE"

COMMUNITY ORIENTED POLICING SERVICES
U.S. DEPARTMENT OF JUSTICE

U.S. Department of Justice, Office of Community Oriented Policing Services

CMARC - Background

- The Central Maryland Area Regional Communications Project includes six Maryland counties plus the cities of Baltimore and Annapolis
- \$5.1 million COPS grant awarded in 2003
- Strong governance structure
- Prior incidents motivated pre-planning and regional cooperation
- Executive sponsorship at the elected official level

CMARC - Project Description

- Building on existing infrastructure
- All counties have existing 800 MHz radio systems
- Using national calling and tactical channels
- Unifies the incident command system involving mutual aid responses in day-to-day events plus critical incidents

Program

PPRCN - Topography

COPS

Interoperable
Communications
Technology
Program

PPRCN - Background

- This project is a partnership of the City of Colorado Springs, El Paso County, CO and Pikes Peak Regional Communications Network, which already existed as a regional communications system.
- \$4.5 million COPS grant awarded in September 2004
- Large military presence in the area (Fort Carson, NORAD, NorthCom, USAF Academy and two additional airbases)

U.S. Department of Justice, Office of Community Oriented Policing Services

PPRCN - Project Description

- The region already operates a 800 MHz trunked system
- The project will upgrade the system to P25 compliance and upgrade portable radios
- The new project will allow interoperability with the local military installations
- The Pikes Peak region will have the capability to integrate into the State's 800 MHz P25 public safety radio system
- It will provide interoperability for first responders to manage mutual aid calls on a day-to-day basis and for critical incidents outside of their communications network

COPS

Interoperable Communications Technology Program

FY 2005 Funding

- The COPS Office was appropriated over \$90 million in FY 2005 for our Interoperable Communications Program
- In the past 2 weeks, we invited 138 targeted regions using MSAs again to apply for this funding, which is similar to the FY 2004 program
- The deadline for proposals is July 15, 2005
- We expect to fund approximately 25-30 jurisdictions with multi-jurisdictional and multidisciplinary interoperability projects
